THAT BILLION DOLLAR HABIT

PPORTS on the part of those who would district the constion by encouraged and plasticed on the long suffering public The total sign of revolt shows a courrence of that healths sturds tentiment which guided the Forted States through many after financial dome. Stanish supporters of the president are having sums moment after locaristing for a year in Ardbursoments at Officer billions and they are absposed to book askuner at the miplaced at his desolute and exclusive disposal. Learning something from the interrogations of Republicans, the Democrats are asking who and wherefore this enormous sum should be placed in the army men rate it among the best di ands of our man who wishes to gove as the world's almoner with risions in the whole army of check for restricted. These becomes are not going to run into on tillnet appropriation replets with slangers until they are furtirded statle a complete explanation of the objects and purposes of the call cubbed from France and backed by repeated admoritions that the many he fortherming without more ado-

Part of the solution wentful by the party dissenters is the probability than the names will be used undrestly to fatten the beef trust which shows no academic of releating in its grasp on the purses of the plain grouple. It is arraned that the expenditure of *DECOURTING for foodstuffs in this country will have the effect of tightening prices of less and pork and delay the day when the everyday American can look lovingly at a fuscious porterhouse steak on his own table instead of gazing ruefully at the trensure coposing behind the plate glass windows of the butcher's ice box. Senator Martin shows with much apprehension the steadily mounting prices of feedstuffs and would like to see a check placed upon the system of charity which keeps the American producer's nose hard against the grindstane of poverty

This imported million system has grown to be a pernicious habit that must be qualted some day even though we are driven to face a clamor from Europe where it is a glaring fact that prices are much lower than in the United States. If the enormous sum demanded by the president is actually needed to save other nations from perishing through starvation the money should be disbursed in the usual way with vouchers and disbursing agents held to close necountability for the faithful discharge of their duties.

Some patriots are growing very auxious about the soldier boy in averring that he has been deprived of his rights in not securing registration for the last election. It would have been better had

they put one over the soldier by taking away his rights when he as absent oversea by making the state dry which would not have curred had the men of draft age remained in Nevada.

Beans, rice and barley are among the drugs reported on the Parific coast where they are aftempting to hold up exorbitant prices

guaranteed by a reckless administration. Producers might as well one associates trees face the inevitable. Prices of all commodities must come down or the wages of the producers must be advanced. This is auto of the rablems of reconstruction -

When Wilson begins his tour of the United States he will not come walkaway from inquisitive voters who will want to know that the its about the treatment of our loys in Figure and his own canderings with royalty

many by furning losss at marchine gum plations and

with makers to kingdom come
